Introduction

We have reviewed the accompanying condensed interim statement of financial position of **TABUK CEMENT COMPANY** (the "Company") as at 30 June 2023, the related condensed interim statements of profit or loss and other comprehensive income for the three- and six-month periods, changes in equity and cash flows for the six months' period then ended, and a summary of significant accounting policies and other explanatory notes. Management is responsible for the preparation and presentation of these condensed interim financial statements in accordance with International Accounting Standard (34) "Interim Financial Reporting" that is endorsed in the Kingdom of Saudi Arabia.

Our responsibility is to express a conclusion on these condensed interim financial statements based on our review.

Scope of Review

We conducted our review in accordance with International Standard on Review Engagements 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity" that is endorsed in the Kingdom of Saudi Arabia. A review of condensed interim financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing that are endorsed in the Kingdom of Saudi Arabia and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying condensed interim financial statements are not prepared, in all material respects, in accordance with International Accounting Standard (34) "Interim Financial Reporting" that is endorsed in the Kingdom of Saudi Arabia.

Other matters

The financial statements of the Company for the three months and six months periods ended 30 June 2022 were reviewed by another auditor who expressed an unmodified conclusion on those condensed interim financial statements on 17 August 2022. 9. LOAN

The Company has bank loan with a local bank with a total amount of SR 185.15 million as at June 30, 2023 (31 December 2022: SR 214,9 million). Total Loan	185,155,373	214,942,099

As a result of rescheduling the loan and modifying the terms, the Company performed a 10% test of the loan commitment in accordance with the requirements of IFRS 9 "Financial instruments" and this test resulted in a gain of SR 22, 758,671. This amount represents the difference between the present value of the loan under the terms before the modification and the present value of future cash payments under the terms of the loan being renegotiated and modified, discounted at the original effective interest rate of the loan. Since the difference is less than 10%, the amendment in the terms is not considered essential, and it is not accounted for as the disposal of the loan obligation and establishment of a new financial obligation. Accordingly, the present value of future cash payments is recognized in accordance with the terms of the modification using the original effective interest rate of the loan, and the difference is recognized as gain from the effect of the modification.

The loan is secured by an investment in the Industrialization and Energy Services Company, note (5). The loan includes financial covenants. 19. FAIR VALUE MEASUREMENT OF FINANCIAL INSTRUMENTS

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs. All assets and liabilities for which fair value is measured or disclosed in the condensed interim financial statements are categorized within the fair value hierarchy.

This is described, as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities.
- Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
- Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

The fair value of financial instruments that are not traded in an active market is determined by using valuation techniques. These valuation techniques maximize the use of observable market data where it is available and rely as little as possible on entity specific estimates. If all significant inputs required to fair value a financial instrument are observable, those financial instruments are classified under level 2. If one or more of the significant inputs is not based on observable market data, the financial instrument is classified under level 3. As of 30 June 2023, the Company's equity investment designated at FVOCI was determined at level 3 of the fair value hierarchy. The carrying values of other financial assets and liabilities in the condensed consolidated interim statement of financial position approximate to their fair values.
